2. Split PDF document
3. Property description

Merge PDF document

Simpo PDF Merge & Split provides two choices for you to merge your files. Each selected file can be merged as a whole part or some parts of it.

1. Simpo PDF Merge & Split provides you an easy-to-use interface to merge your files. Double click the icon to launch the program, and click  to go to merge interface.

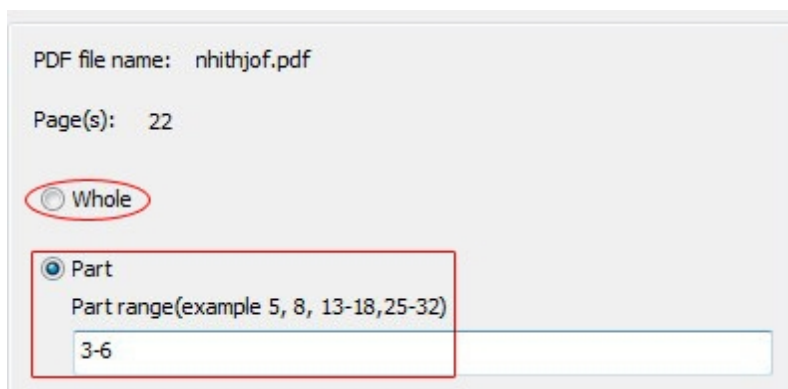

2. Click  button to add the file which you want to combine. Each added file is displayed in the document list window.
3. If you want to remove, select the file, click  button. Click  all your added files will be moved away.
4. Click , your file will move forward one line. Meanwhile, click  the file will move down one line.
5. If your PDF has password, you should select the file, click  to type the

password.

6. Select each file, click  to decide whether it should be merged as whole part or just specific part of it only. The default choice is "Whole".

PDF file name: nhithjof.pdf

Page(s): 22

☐ Whole

☒ Part

Part range(example 5, 8, 13-18,25-32)

3-6

If you want to merge the whole parts of files, you should select "Whole". To merge some specific parts of files together, you need to select "Part" and type the part range. (Note: In this example, the combination will start from the 4th page and stop at the 5th page).

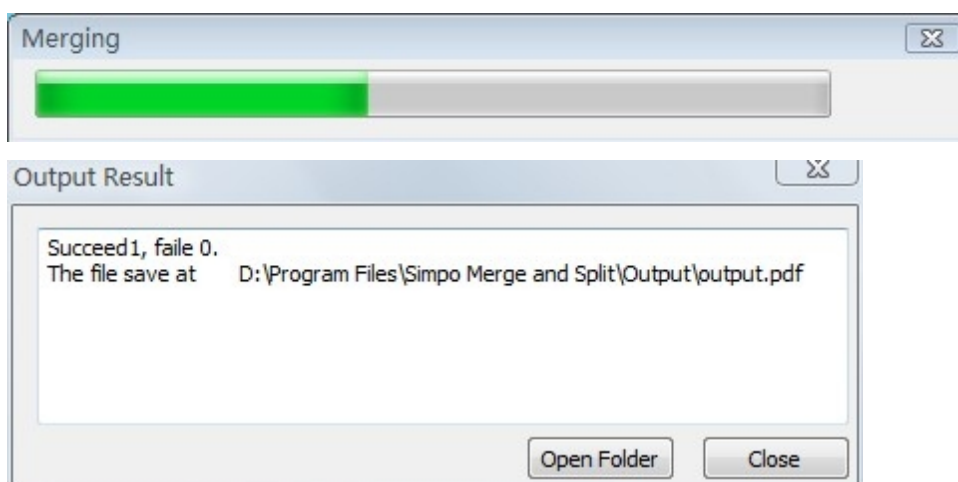

7. If you want to give a name to your new file, you can type it in the "output name".

OutPut Name: output

8. Click  or  to change the directory of your output file.

9. Click  button, your files start merging.

Merging

Output Result

Succeed1, faile 0.

The file save at D:\Program Files\Simp Merge and Split\Output\output.pdf

Open Folder Close

You can either select "Open Folder" to see converted files immediately, or you can just "Close" it.

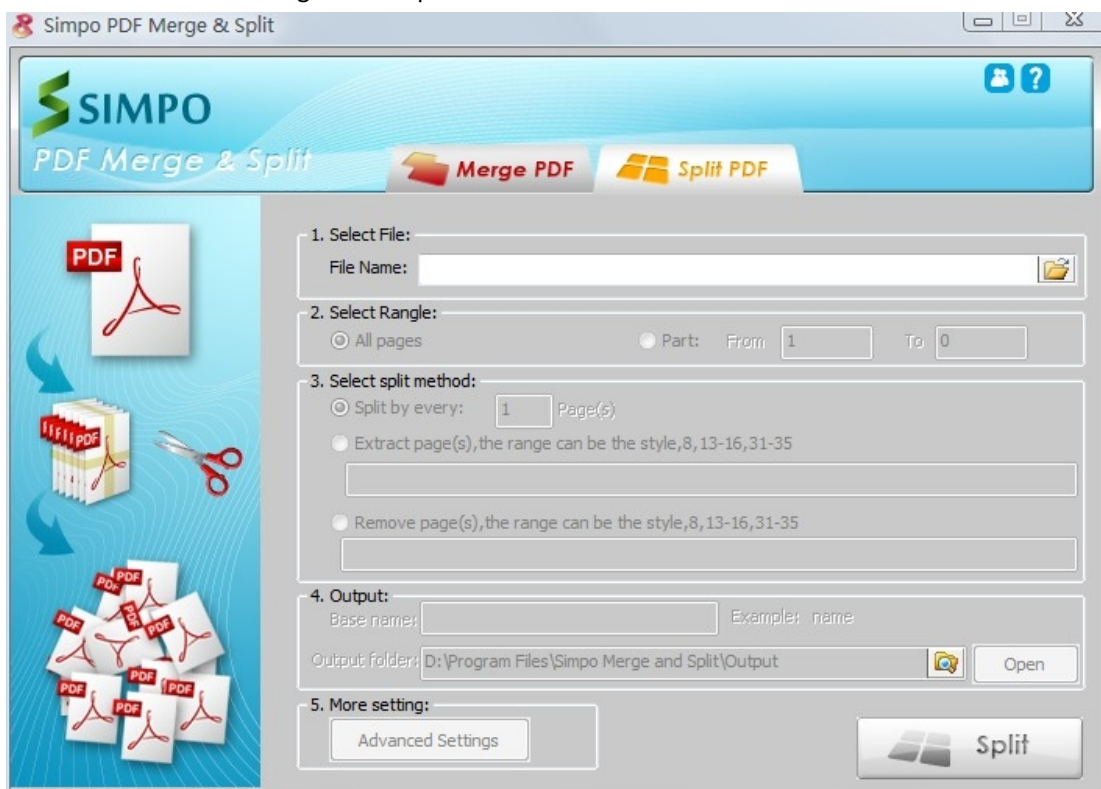

Split PDF document

Simpo PDF Merge & Split supports you to split, extract the proper part and remove the specific part from PDF document.

1. Double click the Simpo PDF Merge & Split icon to launch the program. Click

to go to the split interface.

2. Click  to upload the file which you need to split.
3. Make sure the range of file which should be split. It can be "Whole", or you can specify from which page to which page. It depends on your choice.

4. Select split method.
 - a. Simpo PDF Merge & Split supports you to split your PDF document into separate parts by page number.

If you specify 3 pages, which means each 3 pages of your PDF will be an independent PDF document.

- b. By using Simpo PDF Merge & Split, you can extract any part from your PDF document. It can be a single page or a specific part

You can specify numerous parts; each one should be separated by comma. (Note: in this example, we specify as 2-3 pages, so the extract part will include the 2nd and 3rd page.)

- c. Simpo PDF Merge & Split also allows you to remove some specific parts from the PDF document.

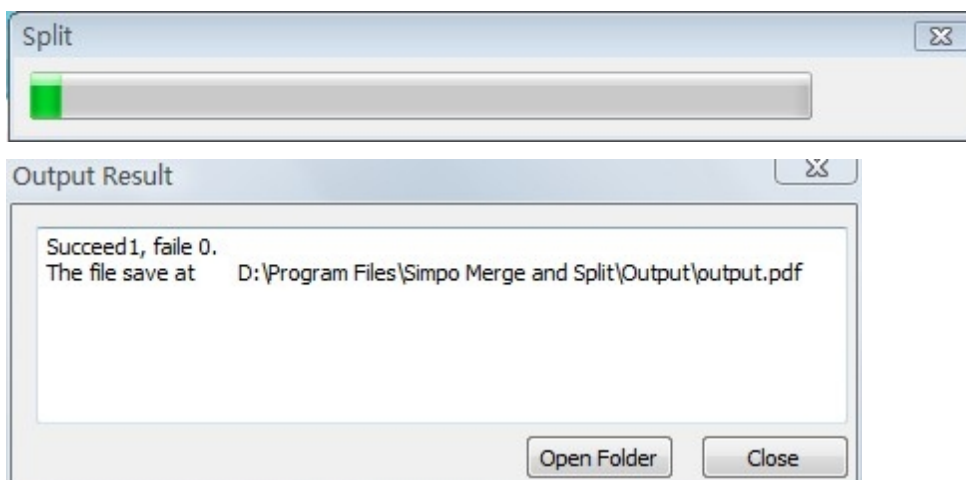

You need specify the page or the part which need to be removed, (Note: in this sample, the removing page will include 5th and 6th.)

5. You can also specify the name of your output files in the "Output name".

6. Click  or  to change the directory of your output file.

7. Click  to start to split PDF document.

You can either select "Open Folder" to see converted files immediately, or you can just "Close" it.
